From the Inside Flap

Given the dramatic changes that have recently occurred in the economy, including the global financial crisis, the topic of capital structure and corporate financing decisions is critically important. But despite being one of the most highly researched topics in finance, many questions within this area still exist.

That is why Capital Structure and Corporate Financing Decisions, part of the Robert W. Kolb Series in Finance, has been created. Filled with in-depth insights and practical advice, this book contains detailed discussions of essential capital structure components; key financial theories as well as empirical support for them; and practices involving corporate financial policies, strategies, and choices. Along the way, the book emphasizes how a sound capital structure can simultaneously reduce a firm's cost of capital and increase value to shareholders.

With chapters from leading academics and researchers from around the world, this reliable resource provides a synthesis of the current state of capital structure and puts a firm's financing decisions in perspective. Divided into four comprehensive parts, it skillfully:

- Examines the factors influencing capital structure decisions as well as the interactions among capital structure, strategy, firm risk, returns, and compensation
- Highlights the key issues involved in capital structure choice
- Explores the various aspects of raising capital, including bank relationships and collateralization, rating agencies and credit insurances, secured finance, and sale and leasebacks
- Discusses special topics involving financial distress, the lease-versus-buy decision, private investment in public equity, and financing mergers and acquisitions

While questions still remain on how firms should determine their financing mix, extensive empirical and theoretical evidence is available to help you unravel the capital structure puzzle. This timely guide contains a wealth of information that will allow you to understand the factors that influence capital structure and financing decisions, and put you in a better position to effectively use these insights in real-world situations.

From the Back Cover

The Robert W. Kolb Series in Finance is an unparalleled source of information dedicated to the most important issues in modern finance. Each book focuses on a specific topic in the field of finance and contains contributed chapters from both respected academics and experienced financial professionals. As part of the Robert W. Kolb Series in Finance, *Capital Structure and Corporate Financing Decisions* contains comprehensive insights on a major aspect of financial management—how capital structure and financing decisions contribute to maximizing the value of a firm.

While determining the precise financing mix to achieve this goal can be difficult, firms need to revisit their portfolio of debt, equity, and hybrid securities to successfully finance assets, operations, and future growth. That is why becoming familiar with this subject is essential.

Divided into four comprehensive parts, this timely guide contains detailed coverage that extends from the basic components of capital structure and existing theories to their application in an increasingly complex business world. Page by page, the book addresses topics that will put you in a better position to excel at this endeavor, including how corporate managers make financing decisions in practice; the economic, regulatory, and industry effects on capital structure; and the various aspects of raising capital to name a few.

Sound capital structure and informed financing decisions can lead to a reduction in a firm's cost of capital and an increase in shareholder value. Developing the critical skills required to make these decisions takes time, but with this book as your guide, you will gain a firm understanding of what you will need to succeed.
