Thankful Nursing Student

By Emma

\$300 less than buying this textbook at the campus bookstore. (Priced \$300-360) The cover is exactly as pictured, white cover, yellow text bubble, med students on the front. It made me nervous considering the lab manuals, etc, I've seen, have a blue cover but it is exactly as needed for class. This is an international version of Hole's Anatomy and Physiology 14th Edition, it's just paperback. Access code and lab book are separate.

It's exactly the same. Do it.

By Online Shopper

I got this for my Anatomy Physiology class and it saved me about \$150. The rental price was more than what I paid to own it. The text and the diagrams were exactly the same as the instructor was using for every single lecture. I only had one dependency the entire semester on one of the "Clinical Application" sections, but it was insignificant as the instructor knew some of the 210 students in the class were using older versions of the text anyway and didn't care because 99.9% of the material was exactly the same. If you are a Pre-med, nursing, dental, what ever... do yourself a favor and this is the textbook you are required for class, get it. Don't be scared. It's the same book with a different cover. In fact, it's a softcover, so it weighs less than the hardcover version.
