Must read!

By Dee

I wish I had this before I graduated college, and definitely before getting my first full time job after graduate school. While reading this, I felt a sense of validation as I witnessed challenges at one place of business that appeared connected to my gender and my race. My experiences elsewhere had been more positive, while I still felt uncomfortable as one of a few females, or one of a few black people.

The inclusion of male and female anecdotes at the end is specially helpful. I think it's important that men are included in this discussion, which they are in this book, and as someone who is just beginning her career, and has experienced many twists and turns along the way, seeing the journey of others is refreshing and helps to put my circumstances into perspective.

A friend recommended this to me, and I have been recommending this to other friends and acquaintances as well.
