TECHNOLOGY, LEARNING, AND INNOVATION: EXPERIENCES OF NEWLY INDUSTRIALIZING ECONOMIES FROM CAMBRIDGE UNIVERSITY PRESS PDF

This volume presents ten original essays and four commentaries contributed by leading scholars in technology and innovation that discuss how newly industrializing countries (NICs), particularly those in East Asia, have transformed themselves from technologically backward and poor to relatively modern and affluent economies over the past thirty years. They provide interesting theoretical perspectives and the insightful understanding of the process of technological progress at both the macro and micro levels in these countries.

A fundamental book on innovation

By Marcelo Nonnenberg

This book brings many fundamental analysis about learning and innovation processes, written by some of the most important authors, like Sanjaya Lall and David Teece . All articles bring important contributions about the relevance of technological innovation to economic growth, mainly in developing economies. Its main conclusion is that "assimilation" theories are superior to "accumulation" theories. Learning is a process firm specific and must be studied at this level.
